

Making Big Ideas Child's Play

[Visit Time Playground to read some comics!](#)

Follow Emma, Ayden, Aunt Glo and Bert as they travel back in time for four fun adventures...

Dodge extinct beasts and tour a busy Stone Age village. Catch a ride to Huffman Prairie to get a glimpse of the Wright brothers in action. Sail down the papyrus-filled Nile in search of ancient treasure. And sneak through a steam-powered factory to claim a chocolatey reward.

This is what you'll learn along the way:

- How stone tools shaped early humans, from hunter-gatherers to skilled farmers, and built the first settlements.
- How our fascination with flying evolved from balloons and gliders to the first mechanical, steerable airplane.
- How ancient Egypt flourished, using grass from the Nile to make everything from clothes to boats and the very first paper.
- How coal and steam fuelled the Industrial Revolution, to bring affordable, mass-produced treats to the world.
